1 Before you start the installation

Important!

Make sure that you are logged in as administrator when installing the software.

Without having administrator rights available on the PC the installation cannot be accomplished.

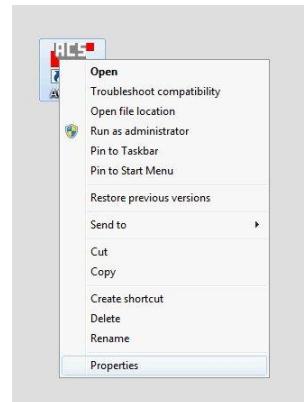

2 Problems and troubleshooting

- Missing serial number for registering
- Problems with font Modern (OEM/DOS)
- Call of submenus (no call)
- Call of language list (no call)

3 After the ACS software installation

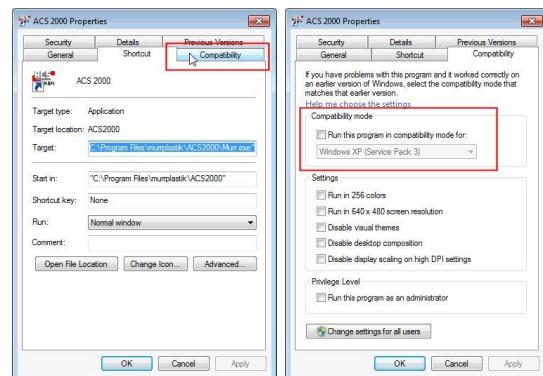

Right-click the program icon on the desktop or in the Start menu.

Click on **Properties**.

In the **Properties** window select the **Compatibility** tab.

Here the compatibility mode can be enabled/disabled.

Click the check box and select the appropriate OS and Service Pack:
- Windows XP Service Pack 3 -

Via the **[Change settings for all users]** button the compatibility mode can be enabled for all users at once.
